

Typeface

Our typeface Mulish is a minimalist Sans Serif typeface, designed for both display and text typography.

Mulish is incredibly versatile with tightened the spacing and kerning and has many glyph refinements throughout the family. The font has a serious, corporate look while also maintaining a human touch and smart look.

Caption 2- Regular Roman/ Bold Roman

Bold Roman / Bold Roman used for subheads.
11px / #333333 / #FFFFFF / line spacing 160%

Colors

Our choice of color palette is a selection of colors that work together to create consistent and appealing visual look. The colours are chosen to represent GeBBS as tech-savvy and smart.

Primary color palette

Our primary palette is the complementary color pairs - white & black, blue & orange. These colours depict modernity, energy and complement the Forward Thinking tagline of GeBBS. They also bring boldness to our brand, establishing our identity as a industry leading company. The colours can be used strategically across the website, collaterals to guide the eye and highlight the important sections.

We use orange (F27405) for primary actions, buttons, text links, for indicating progress and representing authentication. Black (000000) is used primarily for body text and headings, and white is used for page backgrounds.

Secondary color palette

Secondary colors bring contrast and difference to our primary palette. They are used to highlight small but important items in the UI or make our hero sections pop. Our secondary palette colors soften the experience and to impart confidence, inspiration and optimism.

Our secondary palette is made up of Dark blue, light blue, and dual color gredients. Each color is selected intentionally to provide meaningful feedback within our products. See the semantic color guidelines below for more information.
